Remarks

Every detail of this 2003 rebuild was carefully selected and quality crafted. The moment you enter you are greeted by a sun-filled two story entry with built-ins and double closets. Ahead lies a sweeping staircase and beside you the living room with a charming gas fireplace, ample windows, and direct access to the spacious formal dining room. At the heart of the home lies the kitchen; complete with double dishwashers, a 6 burner gas stove and oversized breakfast bar. The kitchen opens to a generously sized living/dining area graced by a fireplace, large windows and glass doors that lead out to the rear patio. The first floor also includes a large office complete with closet and built-ins as well as a guest suite. Upstairs boasts 3 well proportioned bedrooms, family bath, laundry room, and master suite with a walk in closet. Bring your creativity to the lower level where you will find a large cedar closet, laundry room, bath and 2 bonus spaces great for an extra bed, media room or gym.
